CLAIM AMENDMENTS

IN THE CLAIMS

This listing of the claims will replace all prior versions, and listing, of claims in the application or previous response to office action:

1-14. (Cancelled)

15. (Currently Amended) A method for receiving location information, the method comprising:

receiving a message at a first <u>Push-to-Talk over Cellular (PoC)</u> terminal device indicating that a user of a second <u>PoC</u> terminal device has pressed a <u>PoC</u> talk button, the message including a geographical location of the second <u>PoC</u> terminal device; and

indicating the geographical location of the second <u>PoC</u> terminal device to a user of the first <u>PoC</u> terminal device.

16. (Currently Amended) A method for receiving location information as claimed in claim 15, further comprising at least one of:

indicating a direction of the first <u>PoC</u> terminal device from the geographical location of the second <u>PoC</u> terminal device;

indicating a distance of the first <u>PoC</u> terminal device from the second <u>PoC</u> terminal device;

indicating a geographical location of the first <u>PoC</u> terminal device on a map together with the geographical location of the second <u>PoC</u> terminal device; and

indicating coordinates of both the first <u>PoC</u> terminal device and the second <u>PoC</u> terminal device.

17. (Previously Presented) A method for receiving location information as claimed in claim 15, wherein the message is a Push-to-Talk over Cellular message.

- 18. (Previously Presented) A method for receiving location information as claimed in claim 17, wherein the Push-to-Talk over Cellular message is one of a REFER message and a Floor taken message.
- 19. (Currently Amended) A method for transmitting location information, the method comprising:

writing information into a message, in response to a user of a first <u>PoC</u> terminal device pressing a <u>PoC</u> talk button, the information indicating the user pressed the <u>PoC</u> talk button and describing a geographical location of the first <u>PoC</u> terminal device; and

transmitting the message to one of a second **POC** terminal device and a communications network.

- 20. (Currently Amended) A method for transmitting location information as claimed in claim 19, wherein the information describing the geographical location of the first PoC terminal device is written into the message only if a parameter controllable by the user of the first PoC terminal device shows that the geographical location may be indicated.
- 21. (Currently Amended) A method for transmitting location information as claimed in claim 19, wherein the information describing the geographical location of the first PoC terminal device is written into the message only if a parameter controllable by the user of the first PoC terminal device shows that the geographical location may be indicated to another PoC terminal device to which the message is to be sent.
- 22. (Previously Presented) A method for transmitting location information as claimed in claim 19, wherein the message is a Push-to-Talk over Cellular message.
- 23. (Previously Presented) A method for transmitting location information as claimed in claim 22, wherein the Push-to-Talk over Cellular message is one of a REFER message and a Floor taken message.

24. (Currently Amended) A <u>P&C</u> terminal device, comprising:

a receiver, the receiver receiving a message indicating that a user of a further <u>PoC</u> terminal device has pressed a <u>PoC</u> talk button, the message including a geographical location of the further <u>PoC</u> terminal device; and

an indicator, the indicator indicating the geographical location of the further <u>PoC</u> terminal device to a user of the <u>PoC</u> terminal device.

25. (Currently Amended) A <u>Foc</u> terminal device as claimed in claim 24, wherein the indicator is designed to at least one of:

indicate a direction of the <u>PoC</u> terminal device from the geographical location of the further <u>PoC</u> terminal device;

indicate a distance of the <u>PoC</u> terminal device from the further <u>PoC</u> terminal device; indicate a geographical location of the <u>PoC</u> terminal device on a map together with a geographical location of the further <u>PoC</u> terminal device; and

indicate coordinates of both the <u>PaC</u> terminal device and the further <u>PaC</u> terminal device.

- 26. (Currently Amended) A <u>PoC</u> terminal device as claimed in claim 24, wherein the message is a Push-to-Talk over Cellular message.
- 27. (Currently Amended) A <u>PoC</u> terminal device as claimed in claim 26, wherein the Push-to-Talk over Cellular message is a Floor taken message.

28. (Currently Amended) A PoC terminal device, comprising:

a message generator, the message generator writing information into a message, responsive to a user of the <u>PoC</u> terminal device pressing a <u>PoC</u> talk button, the information indicating the user pressed the <u>PoC</u> talk button and describing a geographical location of the <u>PoC</u> terminal device; and

a transmitter, the transmitter transmitting the message to one of a further <u>Poc</u> terminal device and a communications network.

5

- 29. (Currently Amended) A <u>PoC</u> terminal device as claimed in claim 28, wherein the information describing the geographical location of the <u>PoC</u> terminal device is written into the message only if a parameter controllable by the user of the <u>PoC</u> terminal device shows that the geographical location may be indicated.
- 30. (Currently Amended) A <u>PoC</u> terminal device as claimed in claim 28, wherein the information describing the geographical location of the <u>PoC</u> terminal device is written into the message only if a parameter controllable by the user of the <u>PoC</u> terminal device shows that the geographical location may be indicated to another <u>PoC</u> terminal device to which the message is to be sent.
- 31. (Currently Amended) A FC terminal device as claimed in claim 28, wherein the message is a Push-to-Talk over Cellular message.
- 32. (Currently Amended) A <u>Poc</u> terminal device as claimed in claim 31, wherein the Push-to-Talk over Cellular message is a REFER message.
